JULY/AUGUST 2006

SunRise Solar. Let the sun shine in, again and again. This company's original solar-powered attic fan won MVP (2005) and Top 100 awards (2005 and 2006) from BUILDING PRODUCTS, proving some of the niftiest ideas come from small firms. The SunRise 1050 is a winner too. The new fan, which mounts on the roof, runs on solar power, so no wiring or electricity is needed. By removing heat and moisture from the attic, the unit reduces energy consumption, extends the life of HVAC equipment and shingles, and keeps insulation dry, the firm claims. The original model moved 850 cubic feet of air per minute; the 1050 model moves 1,050 cfm. It comes fully assembled and can be installed in less than an hour, says the company. "This is an economical solution and resolves many retrofitting needs," said one judge. 866-599-3566. www.sunrisesolar.net. Circle 267.

MVP AWARD 2006
